Upload/Publish Site: How can I publish/upload my website?

Here are the FTP instructions to upload your website:

If you are using Internet Explorer:

- Type this address on the address bar:

* ftp://your_user_name:your_password@your-domain.com

- Then you will see the folder name mainwebiste_html. Double click on that folder and drag and drop all your html files there.

If that does not work:

- Click on the following link
http://www.download.com/CuteFTP-Professional/3000-2160-10279073.html?tag=lst-0-2

- Then click on Download. Once you have downoaded this software. Install it.

- Once installation is done. Open this software and then here is the information you have to enter to connect to our server.

* Host: your-domain.com
* User: Your User Name
* Pass: Your password
* FTP Directory : /var/www/html/ or mainwebsite_html

- Then you will see the folder name mainwebiste_html. Double click on that folder and drag and drop all your html files there.

Also you can publish your website via FrontPage :

- make your site in your local computer and save it.
- publish your site:
   In FrontPage   --> file ---> publish web...--> and in the "web name" section type exactly:
http://yourdomain.com
(please notice that you should not use ftp here)
Enter the frontpage extension username and password.
